

Toni Sulankivi
Head of Cyber Security

About

Toni Sulankivi started his professional career in Finland 2005 working as an IT and network security expert for companies like IBM, Nokia, and Capgemini.

In 2012 he joined KPMG Finland to consult, audit, and train various customers in cyber security and network architecture topics both in private and governmental sectors.

In 2015 he started working in the UAE, where he led teams and helped to build cyber defenses for mission-critical infrastructures for the military and a nuclear power plant.

In 2020 Toni joined tiko Energy Solutions AG as Head of Cyber Security.

Toni holds an MSc in Information Technology from Tampere University of Technology, and several international certifications from associations including ISACA, ISC2 and GIAC.

At **tiko**, we believe that the energy revolution comes from the people, for the people, and that a better earth with only be possible if we collectively change the way we consume energy.

Our flexible and modular technology enables innovative solutions for prosumers to maximize their self-consumption, and thus their return on investment. Consumers gain insight and control over their energy consumption and increase their comfort. We put this unique knowledge at the disposal of our partners, making them leaders of the energy revolution, and helping them to gain an innovative image among their customers. **tiko is a company from the ENGIE Group.**
